### Vision Statement:

Cinemax will continue to serve as a comprehensive platform for movie enthusiasts, providing a rich database of films from classics to the latest releases. Positioned as a desktop Java application, it features an interactive graphical user interface (GUI) integrated with a database to store and retrieve movie information, user reviews, and ratings. The goal of Iteration 2 is to enhance user engagement through social features, improve the movie database's comprehensiveness, and begin implementing personalized recommendations.
